

Investment Policy

The 2PM BOND sub-fund seeks to exceed the return of the Iboxx Euro Corporate Index over the long-term by investing principally in government and corporate bonds (direct lines or investment funds) that are denominated in Euro and presenting a certain rating. The Sub-Fund may use derivatives to reduce its exposure to various investment risks (hedging) and for efficient portfolio management and to seek investment gains.

* Results are based on historical data (source Bank Degroef) and are therefore of limited value as guidance for the future. Performance figures from the past can be misleading. They take no account of possible mergers of funds, which means that past results may have been obtained in circumstances that no longer apply. Performances are calculated on an annual basis, exclusive of non-recurring costs incurred by the investor.

Risk Indicator

Lower potential risk/reward

Higher potential risk/reward

Not risk-free.

Scale running from 1 (lowest risk) to 7 (highest risk). The risk indicator is a Synthetic Risk and Reward Indicator (SRRI), as prescribed by the European Securities and Markets Authority (ESMA). The risk category is an indicator of the risk linked to an investment in a UCITS or a compartment. Any change in the risk category will be specified in the periodic reports of the UCITS. For more information visit www.esma.europa.eu.

Additional information on possible risks in case of unusual market conditions

Counterparty risk : The Sub-Fund could lose money if an entity with which it does business becomes unwilling or unable to honour its commitments to the Sub-Fund.

Default risk : A bond may lose part or its entire value if the issuer is unable to pay interest or repay principal on schedule.

Derivatives risk : Certain derivatives could increase Sub-Fund volatility or expose the Sub-Fund to losses greater than the cost of the derivative.

Liquidity risk : Certain securities could become hard to sell at a desired time and price.

Management risk : Portfolio management techniques that have worked well in normal market conditions could prove ineffective or detrimental during unusual conditions.

Operational risk : In any market, but especially in emerging markets, the fund could lose some or all of its money through a failure in asset safekeeping or through fraud, corruption, political actions or any other unexpected events.
